METAL PROGRESS

THE MAGAZINE OF MATERIALS AND PROCESS ENGINEERING

Volume 87
January 1965 through June 1965

ALLEN G. GRAY, *Editor;*
Director, Periodical Publications, ASM

RALPH G. DERMOTT, *Managing Editor*

CARL R. WEYMUELLER
Associate Editor

FRED L. SIEGRIST
Associate Editor

ELIZABETH M. ALDRICH
Assistant Editor

FLOYD E. CRAIG
Art Director

Metal Progress Is Owned and Published by

THE AMERICAN SOCIETY FOR METALS

Metals Park, Ohio

Subject Index

Adhesion
Metallic Adhesion in Vacuum, by T. Spalvins and D. V. Keller *(d)* 4-176

Aircraft
How We Will Build the SST, by Ralph G. Dermott 2-74

Alloy steels
Cooling Transformation Diagram for AISI 4640 ..... 1-94; *(ds)* 1-96
Creep Properties of a Molybdenum-Vanadium Steel, by Thomas E. Geiger 6-68
How Austenitizing Temperatures Affect Transformations, by E. P. Klier and Jane Jellison *(d)* 4-178
Where the Ultrahigh Strength Steels Stand Today, by Carl R. Weymueller 2-112

Aluminum
Better Anodized Surfaces for Aluminum *(tn)* 4-9
Bright Aluminum Alloy for Auto Trim Offers Improved Formability *(tn)* 5-8
Here's What You Can Do With Dip Brazing, by Paul B. Dickerson 5-80
How to Dip Braze Aluminum Assemblies, by Paul B. Dickerson 6-73
Materials for Fabricating High Strength Structures 3-9
New Technique Enhances Corrosion Resistance of Aluminum, by Marvin R. Bothwell 3-81
Wedge-Action Press Stretch Forms Aluminum Sheet *(tn)* 4-7
Technology Forecast '65 1-71

Aluminum oxide
Engineering Applications for Flame Plating, by Thomas C. McGeary and John M. Koffskey 1-80

Austenite, retained
Measuring Retained Austenite by X-Ray Techniques, by Ragnar Lindgren 4-102

Automotive components
The Economic Role of Nondestructive Testing, by W. E. Thomas 3-63
Spot Welding Galvanized Steel for Automotive Parts, by William L. Neely.... 4-56

Bearings
Graphite and Liquid Oxygen, by W. F. Hady, G. P. Allen and R. L. Johnson *(d)* 3-179
Precision Bearings Made From Machinable Carbide *(tn)* 5-8
Steel-Aluminum Bearing Operates Under High Loads *(tn)* 5-7

Beryllium
Technology Forecast '65 1-72
What to Consider When Applying Beryllium, by Carl G. Jennings, Louis E. Colteryahn and Monroe H. Bester .5-104

Biographies
ASM President for 1964-65: John A. Fellows, by J. Stanley Skoglund 6-100

Borides
Properties of Solids That Melt Above 4000 F, by Samuel Sklarew and Melvin J. Albom *(ds)* 2-106

Boron nitride
Boron Nitride for Aerospace Applications, by James Fredrickson and William H. Redanz 2-97
Pyrolytically Derived Refractory Materials, by Samuel Sklarew and Melvin J. Albom 2-102

Brasses
Making Structural Parts by Powder Metallurgy, by Fred L. Siegrist 6-89
Modern Brass Mill Caters to Fabricators' Needs, by Fred L. Siegrist 2-129

Brazing
An Elevator-Type Furnace for Precision Brazing *(sr)* 5-103
Technology Forecast '65 1-71

Cadmium-titanium alloys
Cadmium-Titanium Plating: An Improved Process for Protecting High Strength Steels, by Dewey M. Erlwein and Robert E. Short 2-93
Cd-Ti Plating Retards Corrosion and Hydrogen Embrittlement *(tn)* 2-8
Technology Forecast '65 1-77

Carbides
Engineering Applications for Flame Plating, by Thomas C. McGeary and John M. Koffskey 1-80
Precision Bearings Made From Machinable Carbide *(tn)* 5-8
Properties of Solids That Melt Above 4000 F, by Samuel Sklarew and Melvin J. Albom *(ds)* 2-106
Pyrolytically Derived Refractory Materials, by Samuel Sklarew and Melvin J. Albom 2-102

Carbide tools
Wear Resistant Compacting Tools Made From Machinable Carbide *(tn)*..... 1-8

Carbon steels
Fracture in Mild Steel, by F. W. Barton and W. J. Hall *(d)* 3-175
How Coatings Affect Weldability of Low Carbon Steel, by Herbert A. Jahnle 4-62
Strengthening Low Carbon Steels, by K. J. Irvine and F. B. Pickering *(d)* 3-168

Casting
New Installations Highlight Progress in Pressure Casting *(tn)* 2-8
Outlook for Pressure Casting, by Carl R. Weymueller 5-113
Technology Forecast '65 1-69

Cast iron
Technology Forecast '65 1-70

Ceramic tools
How Ceramic Tools Fail, by A. J. Pekelharing *(d)* 6-172
How Ceramic Tools Wear, by A. G. King *(d)* 1-146

Chromium carbide
Engineering Applications for Flame Plating, by Thomas C. McGeary and John M. Koffskey 1-80

Chromium steels
A Better Roll Composition, by G. F. Melloy *(d)* 2-188
Where the Ultrahigh Strength Steels Stand Today, by Carl R. Weymueller ..2-112

Chromizing
Chromizing Iron Powders, by P. J. Brotherton and M. A. H. Howes *(d)* ..6-180

Coatings
Coating Protects Copper in Decorative Uses *(tn)* 1-9
Engineering Applications for Flame Plating, by Thomas C. McGeary and John M. Koffskey 1-80

Cobalt alloys
Materials for Gas Turbine Engines, by Howard C. Cross 3-67
Materials for Hydrofoils, by A. E. Hohman and W. L. Kennedy *(d)* 4-158
Materials for Large Power Turbines, by Howard C. Cross 4-91
The Potential for Cobalt-Tungsten Superalloys, by John C. Freche, Richard L. Ashbrook and Gary D. Sandrock 5-74
Technology Forecast '65 1-73

Cold extrusion
Cold Extruding Titanium, by R. J. Fiorentino, A. M. Sabroff and P. D. Frost *(d)* 1-147

Cold forging
Making and Selecting Steel for Cold Forging, by Richard Gaydos 4-109

Columbium
Flash Welding Proved Feasible for Columbium and Tantalum *(tn)* 5-9
Technology Forecast '65 1-72

Composite materials
Fibrous Composites for Seals, by L. L. Smith *(d)* 2-182

Computers
Computer Guides Steelmakers 2-139
Computing Charges for Electric Furnaces, by Ben T. Bernacchi and Edward F. Dudley, Jr. 6-121

Continuous casting
Computer Control Suggested for Continuous Casting *(tn)* 2-9
From Overseas, Continuously Cast I-Beams *(tn)* 1-7
Technology Forecast '65 1-69

Controlled atmospheres
Applying Controlled Atmospheres, by Edward C. Bayer 3-94
Generating Atmospheres, by William H. Boyd 3-91
Maintaining Atmosphere Generators, by Richard J. Light 3-97
Panel of Experts Answers Atmosphere Questions 3-101

Cooling curves
Cooling Transformation Diagram for AISI 4640 .....1-94; *(ds)* 1-96

Copper
Coating Protects Copper in Decorative Uses *(tn)* 1-9
The Role of Powder Metallurgy in Manufacture of Electrical Contacts, by George A. Meyer 6-95
Technology Forecast '65 1-

***(cp)* Critical Point; *(d)* Digest; *(ds)* Data Sheet; *(sr)* Short Runs; *(tn)* Technical News**

Copper alloys
Chemical Standards Planned for Two Beryllium-Copper Alloys *(tn)* 2-8
Copper-Beryllium Strip at High Temperatures, by K. G. Wikle and N. P. Sarle *(d)* 1-151
Heat Treatable Copper Alloys Broaden Property Spectrum, by C. Lawrence Bulow 3-56
Making Structural Parts by Powder Metallurgy, by Fred L. Siegrist 6-89
Modern Brass Mill Caters to Fabricators' Needs, by Fred L. Siegrist 2-129
Properties and Uses for Heat Treatable Copper Alloys, by C. Lawrence Bulow *(ds)* 3-88

Corrosion resistance
Heat Treatment Affects Corrosion Resistance, by Michael A. Streicher *(d)* 3-171

Cost analysis
Industry Puts the Dollar Sign on Materials and Processing Decisions 6-54

Creep tests
Creep Properties of a Molybdenum-Vanadium Steel, by Thomas E. Geiger 6-68

Crystallization
Magnets With Columnar Crystals, by J. E. Gould *(d)* 6-164

Cutting
Cutting and Forming of Tungsten Sheet, by Henry W. Babel and Robert M. Bonesteel 4-66
Hot Cutting and Grinding . . . Two New Tools Speed Steel Processing, by Carl R. Weymueller 1-123

Die casting
Technology Forecast '65 1-74

Diffusion bonding
An Efficient Joining Technique . . . Diffusion Bonding, by Earl C. Vicars 4-125

Dimensional control
Controlling Part Dimensions During Fabrication and Heat Treatment, by John A. Ferrante 1-87

Dip brazing
Here's What You Can Do With Dip Brazing, by Paul B. Dickerson 5-80
How to Dip Braze Aluminum Assemblies, by Paul B. Dickerson 6-73

Drawing
Manufacturing Techniques for Sheet Metal Parts, by C. H. Fischer 4-76

Editorial
Metals, Materials and Metallurgists, by Newton N. Sacks *(cp)* 3-55
Oceanspace: New Challenge to Materials, by Allen G. Gray *(cp)* 5-55
Powder Metallurgy Is a Process, by Arthur D. Schwope *(cp)* 6-53
Self-Renewal: Can You Afford Apathy? by Allen G. Gray *(cp)* 1-79
Technological Innovation and Productivity, by Allen G. Gray *(cp)* 4-55
The Vanguard of New Technologies, by Allen G. Gray *(cp)* 2-73

Electric contacts
The Role of Powder Metallurgy in Manufacture of Electrical Contacts, by George A. Meyer 6-95

Electric discharge machining
Tool Steels Surface Hardened by Electrical Discharge Machining *(tn)* 5-9

Electrodeposition
Painting Steel Parts by Electrodeposition, by Tom Bishop 1-116

Electroforming
New Techniques Set Fast Pace for Electroforming *(tn)* 1-7

Electron beam welding
Applications Near for Nonvacuum Electron Beam Welding *(tn)* 3-7

Electrophoretic plating
Painting Steel Parts by Electrodeposition, by Tom Bishop 1-116

Electroplating
Cadmium-Titanium Plating: An Improved Process for Protecting High Strength Steels, by Dewey M. Erlwein and Robert E. Short 2-93
Cd-Ti Plating Retards Corrosion and Hydrogen Embrittlement *(tn)* 2-8
Plating Precious Metals, by D. Gardner Foulke and David C. Johnson *(d)* 1-150
Technology Forecast '65 1-77

Explosive bonding
Inconel Facing Joined to Tube Sheet by Explosive Bonding *(tn)* 4-9

Fabrication
Controlling Part Dimensions During Fabrication and Heat Treatment, by John A. Ferrante 1-87
Fabricating Under an Inert Atmosphere, by Leonard M. Bianchi 3-127

Fatigue
Fatigue in Nylon, by R. L. Mehan *(d)* 6-170
Practical Aspects of Fatigue, by Jack E. LaBelle 5-68

Finishes
Progress in Control of Surface Finishes *(tn)* 2-7

Flame plating
Engineering Applications for Flame Plating, by Thomas C. McGeary and John M. Koffskey 1-80

Flame spraying
Protecting Titanium at High Temperatures, by Raymond L. Farrow and Milton Levy *(d)* 1-182

Forging
Determining Forging Ranges by Hot Tensile Impact Testing, by Christian D. Harnish, Lewis P. Myers and Samuel E. Tyson 5-86
King Sized Tank Equipped to Quench Forgings Rapidly *(sr)* 1-114
Technology Forecast '65 1-76

Forming
Cutting and Forming of Tungsten Sheet, by Henry W. Babel and Robert M. Bonesteel 4-66
Manufacturing Techniques for Sheet Metal Parts, by C. H. Fischer 4-76
Technology Forecast '65 1-76
What You Can Do With Magnetic Pulse Forming, by David F. Brower 4-79

Fractures
Fracture in Mild Steel, by F. W. Barton and W. J. Hall *(d)* 3-175

Free-machining steels
Free-Machining Steels in Service, by G. Koves *(d)* 1-149
How Surface-to-Center Variations in Sulfides Affect Free-Machining Steels, by Raymond C. Spencer 2-118

Friction
Wear and Friction of Solid Surfaces, by William A. Glaeser *(d)* 4-146

Furnaces
Applying Controlled Atmospheres, by Edward C. Bayer 3-94
Computing Charges for Electric Furnaces, by Ben T. Bernacchi and Edward F. Dudley, Jr. 6-121
An Elevator-Type Furnace for Precision Brazing *(sr)* 5-103
Gas Fired Furnaces Produce Ductile Iron *(sr)* 6-102
Generating Atmospheres, by William H. Boyd 3-91
Maintaining Atmosphere Generators, by Richard J. Light 3-97
Panel of Experts Answers Atmosphere Questions 3-101

Galvanized steels
How Coatings Affect Weldability of Low Carbon Steel, by Herbert A. Jahnle 4-62
Spot Welding Galvanized Steel for Automotive Parts, by William L. Neely 4-56

Gas generating systems
Applying Controlled Atmospheres, by Edward C. Bayer 3-94
Generating Atmospheres, by William H. Boyd 3-91
Maintaining Atmosphere Generators, by Richard J. Light 3-97
Panel of Experts Answers Atmosphere Questions 3-101

Gas turbine engines
Materials for Gas Turbine Engines, by Howard C. Cross 3-67
Materials for Large Power Turbines by Howard C. Cross 4-91
Two British Steels for Gas Turbine Disks . . . H.46 and H.53, by Harry C. Child 1-104

Gears
Hardening Large Gears Tooth by Tooth, by Paul Lavins 2-109

Gold
Uses for Noble Metals in Industry, by Gilbert L. Tugwell 6-79

Graphite
Graphite and Liquid Oxygen, by W. F. Hady, G. P. Allen and R. L. Johnson *(d)* 3-179
Pyrolytically Derived Refractory Materials, by Samuel Skiarew and Melvin J. Albom 2-102

Grinding
Disk Grinder Turns Out Close Tolerance Ferrite Parts *(tn)* 5-8
Hot Cutting and Grinding . . . Two New Tools Speed Steel Processing, by Carl R. Weymueller 1-123

Hardness conversions
Correlating Knoop and Mohs Hardness Scales, by Charles Hays, Ernest G. Kendall and Charles D. Hoskins 4-106

Heat resistant alloys
Determining Forging Ranges by Hot Tensile Impact Testing, by Christian D. Harnish, Lewis P. Myers and Samuel E. Tyson 5-86
Forging Ranges for Steels and Superalloys *(ds)* 5-90
The Potential for Cobalt-Tungsten Superalloys, by John C. Freche, Richard L. Ashbrook and Gary D. Sandrock 5-74
Technology Forecast '65 1-72

Heat treatment
Controlling Part Dimensions During Fabrication and Heat Treatment, by John A. Ferrante 1-87
How to Heat Treat D6AC Steel, by Gordon L. Peterman 2-80
Technology Forecast '65 1-69

Heavy machinery
Certifying Heavy Machinery for Tough Jobs, by Franklin H. Pennell 1-99

Helical springs
Relaxation of Helical Springs at Room Temperature, by Melvin C. Vagle, Jr. 2-124

High strength steels
How to Heat Treat D6AC Steel, by Gordon L. Peterman 2-80
Inclusions and Fatigue Life, by W. E. Duckworth and E. Ineson *(d)* 4-193
Materials for Gas Turbine Engines, by Howard C. Cross 3-67
Materials for Large Power Turbines, by Howard C. Cross 4-91
Where the Ultrahigh Strength Steels Stand Today, by Carl R. Weymueller 2-112

Hulls
Materials for Fabricating High Strength Structures 3-9

Hydrofoils
Materials for Hydrofoils, by A. E. Hohman and W. L. Kennedy *(d)* 4-158

Hydrospace
Oceanspace: New Challenge to Materials, by Alen G. Gray *(cp)* 5-55

Induction hardening
Hardening Large Gears Tooth by Tooth, by Paul Lavins 2-109
Technology Forecast '65 1-70

Inspection
Certifying Heavy Machinery for Tough Jobs, by Franklin H. Pennell 1-99

Intermetallics
Properties of Solids That Melt Above 4000 F, by Samuel Sklarew and Melvin J. Albom *(ds)* 2-106

Iron
Chromizing Iron Powders, by P. J. Bretherton and M. A. H. Howes *(d)* ..6-180
Making Structural Parts by Powder Metallurgy, by Fred L. Siegrist 6-89
Martensite in Pure Iron, by M. J. Bibby and J. Gordon Parr *(d)* 6-149
Selecting the Right Steel for Porcelain Enameling, by Michael C. Kopchak 3-109
What to Look for When Specifying Resistance Heating Alloys for Higher Temperatures, by Per O. Johansson 2-145

Lasers
Laser Beams Drill Small Holes *(tn)* 5-9

Lubrication
Lubricating With Lead, Tin, Zinc and Cadmium, by M. Imai and E. Rabinowicz *(d)* 2-183
Machining Aerospace Alloys, by P. R. Arzt and I. J. Stewart *(d)* 5-140
Wear and Friction of Solid Surfaces, by William A. Glaeser *(d)* 4-146

Machining
How Boeing Machines Titanium Aircraft Parts, by Earl Hill and William J. Maxson 2-90
Machining Aerospace Alloys, by P. R. Arzt and I. J. Stewart *(d)* 5-140
Machining Difficult Materials . . . Titanium Alloys, by Michael Field, Norman Zlatin and Robert T. Jameson 2-84
Technology Forecast '65 1-76
Tool Oscillation Aids Machining, by Milan Dlouhy and Josef Houdek *(d)* 6-146

Magnesium
Fatigue Behavior of Magnesium, by M. J. May and R. W. K. Honeycombe *(d)* 6-153
Technology Forecast '65 1-71

Magnetic pulse forming
What You Can Do With Magnetic Pulse Forming, by David F. Brower 4-79

Magnets
Magnets With Columnar Crystals, by J. E. Gould *(d)* 6-164

Maraging steels
How to Weld Thick Plates of 18% Ni Maraging Steel, by Philip P. Crimmins and Walter S. Tenner 5-57
Welding Techniques and Performance Tests, by Robert C. Bertossa *(d)* 2-176
Where the Ultrahigh Strength Steels Stand Today, by Carl R. Weymueller 2-112

Martensite
Martensite in Pure Iron, by M. J. Bibby and J. Gordon Parr *(d)* 6-149

Materials selection
Industry Puts the Dollar Sign on Materials and Processing Decisions 6-54

Metal foils
Testing Metal Foil *(sr)* 4-105
Testing Molybdenum Foil Sandwiches at High Temperature, by A. R. Hunter *(d)* 5-168

Metallography, specimen preparation
How to Prepare Hydrided Zircaloy-2 for Microscopic Examination, by McIntyre R. Louthan, Jr. and Charles E. Padgett 5-133

Metalworking
Predicting Metalworking Properties From Tensile Test Data, by Tatsuo T. Kumasaka and John W. Barnet 3-84

Molybdenum
Solving the Molybdenum Shortage *(tn)* 4-7
Welding Techniques and Performance Tests, by Robert C. Bertossa *(d)* 2-176

Molybdenum steels
Creep Properties of a Molybdenum-Vanadium Steel, by Thomas E. Geiger 6-68

Nickel
Making TD Nickel Parts, by Thomas K. Redden and James F. Barker 1-107
Materials for Gas Turbine Engines, by Howard C. Cross 3-67
Materials for Large Power Turbines, by Howard C. Cross 4-91
New Techniques Set Fast Pace for Electroforming *(tn)* 1-7
TD Nickel Evaluation Program Aims for High Temperature Coatings 1-9
Technology Forecast '65 1-76

Nickel alloys
Heat Treatment Affects Corrosion Resistance, by Michael A. Streicher *(d)* 3-171
Materials for Hydrofoils, by A. E. Hohman and W. L. Kennedy *(d)* 4-158
Nickel Base Alloys for Turbine Buckets, by James R. Johnston, Charles A. Gyorgak and John H. Sinclair *(d)* ..5-158

Nickel steel
How to Weld Thick Plates of 18% Ni Maraging Steel, by Philip P. Crimmins and Walter S. Tenner 5-57

Nitrides
Properties of Solids That Melt Above 4000 F, by Samuel Sklarew and Melvin J. Albom *(ds)* 2-106

Nodular iron
Gas Fired Furnaces Produce Ductile Iron *(sr)* 6-102

Nondestructive testing
Certifying Heavy Machinery for Tough Jobs, by Franklin H. Pennell 1-99
The Economic Role of Nondestructive Testing, by W. E. Thomas 3-63

Notch strength
Notch Brittleness in Steel, by J. F. Knott and A. H. Cottrell *(d)* 6-158

Oxides
Engineering Applications for Flame Plating, by Thomas C. McGeary and John M. Koffskey 1-80
Properties of Solids That Melt Above 4000 F, by Samuel Sklarew and Melvin J. Albom *(ds)* 2-106

Pickling
Pickling in Hydrochloric Acid . . . A Better Way to Clean Steel, by David E. Poole 3-119

Plastics
Materials for Fabricating High Strength Structures 3-9
New Plastic Stays Strong Over Wide Temperature Range *(tn)* 2-9
Technology Forecast '65 1-75
Treating Plastic Parts in a Salt Bath, by Quentin D. Mehrkam *(sr)* 3-106

Plastics, butyrate
What Engineers Should Know About Butyrate Plastics, by Roy O. Hill, Jr. 4-97

Plastics, nylon
Fatigue in Nylon, by R. L. Mehan *(d)* ..6-170
Thin Nylon Film Withstands Rupture at 400 F *(tn)* 5-8

Plastics, reinforced
Reinforced Plastics in Engineering Applications, by Fred L. Siegrist 5-93
Stressed Applications for Reinforced Plastics, by John F. Corey 3-75
Use of Reinforced Plastics Shows Steady Gains *(tn)* 3-8

Plating
Engineering Applications for Flame Plating, by Thomas C. McGeary and John M. Koffskey 1-80

Platinum metals
Uses for Noble Metals in Industry, by Gilbert L. Tugwell 6-79

Porcelain enameling
Selecting the Right Steel for Porcelain Enameling, by Michael C. Kopchak 3-109

Powder metallurgy
Making Structural Parts by Powder Metallurgy, by Fred L. Siegrist 6-89
Powder Metallurgy Is a Process, by Arthur D. Schwope *(cp)* 6-53
The Role of Powder Metallurgy in Manufacture of Electrical Contacts, by George A. Meyer 6-95
Technology Forecast '65 1-73

Precious metals
Plating Precious Metals, by D. Gardner Foulke and David C. Johnson *(d)* 1-150
Uses for Noble Metals in Industry, by Gilbert L. Tugwell 6-79

Press forming
Press Formability of Austenitic Stainless Steel, by Herbert L. Black and Louis W. Lherbier 6-62

Production
Industry Puts the Dollar Sign on Materials and Processing Decisions 6-54

Pyrolysis
Pyrolytically Derived Refractory Materials, by Samuel Sklarew and Melvin J. Albom 2-102

Quenching
King Sized Tank Equipped to Quench Forgings Rapidly *(sr)* 1-114

Refractory materials
Melting Refractory Compounds, by E. L. Foster, N. E. Daniel, R. W. Getz, R. W. Endebrock and R. F. Dickerson *(d)* 5-144
Properties of Solids That Melt Above 4000 F, by Samuel Sklarew and Melvin J. Albom *(ds)* 2-106
Pyrolytically Derived Refractory Materials, by Samuel Sklarew and Melvin J. Albom 2-102

Refractory metals
Fabricating Under an Inert Atmosphere, by Leonard M. Bianchi 3-127
Machining Aerospace Alloys, by P. R. Arzt and I. J. Stewart *(d)* 5-140
Protecting Refractory Metals From Oxidation at High Temperatures, by Alvin A. Machonis *(d)* 1-138
Pyrolytically Derived Refractory Materials, by Samuel Sklarew and Melvin J. Albom 2-102
The Role of Powder Metallurgy in Manufacture of Electrical Contacts, by George A. Meyer 6-95
Technology Forecast '65 1-76

Resistance alloys
What to Look for When Specifying Resistance Heating Alloys for Higher Temperatures, by Per O. Johansson ..2-145

Resistance welding
High Frequency Resistance Welders Installed in Three Pipe Mills *(tn)* 3-8
Technology Forecast '65 1-74

Rolls
A Better Roll Composition, by G. F. Melloy *(d)* 2-188

Sandwich structures
An Efficient Joining Technique . . . Diffusion Bonding, by Earl C. Vicars 4-125
Testing Molybdenum Foil Sandwiches at High Temperature, by A. R. Hunter *(d)* 5-168

Screws
Unified Screw Thread Recognized by International Group *(tn)* 2-7

Seals
Fibrous Composites for Seals, by L. L. Smith *(d)* 2-182
Graphite and Liquid Oxygen, by W. F. Hady, G. P. Allen and R. L. Johnson *(d)* 3-179

***(cp)* Critical Point; *(d)* Digest; *(ds)* Data Sheet; *(sr)* Short Runs; *(tn)* Technical News**

Sheet
Manufacturing Techniques for Sheet Metal Parts, by C. H. Fischer 4-76

Silicides
Properties of Solids That Melt Above 4000 F, by Samuel Sklarew and Melvin J. Albom *(ds)* 2-106

Silicon carbide
Pyrolytically Derived Refractory Materials, by Samuel Sklarew and Melvin J. Albom 2-102

Silver
The Role of Powder Metallurgy in Manufacture of Electrical Contacts, by George A. Meyer 6-95
Uses for Noble Metals in Industry, by Gilbert L. Tugwell 6-79

Specifications
Developing AMS Specifications, by Donald E. Manning *(d)* 1-151

Spot welding
How Coatings Affect Weldability of Low Carbon Steel, by Herbert A. Jahnle 4-62
Spot Welding Galvanized Steel for Automotive Parts, by William L. Neely 4-56

Springs
Relaxation of Alloy Springs at Various Temperatures, by W. James Besemer and Vincent A. Stanton *(ds)* 4-88
Relaxation of Helical Springs at Room Temperature, by Melvin C. Vagle, Jr. 2-124
Springs for Use at High Temperatures, by W. James Besemer and Vincent A. Stanton 4-84

Stainless steels
Materials for Fabricating High Strength Structures 3-9
A New Stainless Steel for Turbine Rotors, by Clarence J. Boyle and David L. Newhouse 3-61
Press Formability of Austenitic Stainless Steel, by Herbert L. Black and Louis W. Lherbier 6-62
Technology Forecast '65 1-68
Two British Steels for Gas Turbine Disks . . . H.46 and H.53, by Harry C. Child 1-104
Where the Ultrahigh Strength Steels Stand Today, by Carl R. Weymueller ..2-112

Stamping
The New Breed of Stampings, by Frank Covelli 1-91

Standards
Unified Screw Thread Recognized by International Group *(tn)* 2-7

Steelmaking
Computer Guides Steelmakers 2-139
Computing Charges for Electric Furnaces, by Ben T. Bernacchi and Edward F. Dudley, Jr. 6-121
Five-Stand Mill Rolls 72,000 Lb Steel Coils 2-139
Technology Forecast '65 1-6

Steels
A Carbon-Manganese Steel From Britain *(tn)* 1-9
Determining Forging Ranges by Hot Tensile Impact Testing, by Christian D. Harnish, Lewis P. Myers and Samuel E. Tyson 5-86
An Economical Steel With Strength and Wear Resistance *(tn)* 4-8
Engineers Utilize Modern Steels in New Ways *(tn)* 3-7
Forging Ranges for Steels and Superalloys *(ds)* 5-90
From Overseas, Continuously Cast I-Beams *(tn)* 1-7
Glass Coatings Protect Hot Steels *(tn)* 3-8
Heat Resistant Steels Aim for Muffler Applications *(tn)* 6-7
Hot Cutting and Grinding . . . Two New Tools Speed Steel Processing, by Carl R. Weymueller 1-123
How Plate Thickness Affects Transition Temperature, by R. D. Stout, C. R. Roper and D. A. Magee *(d)* 3-169
How to Heat Treat D6AC Steel, by Gordon L. Peterman 2-80
How to Weld Thick Plates of 18% Ni Maraging Steel, by Philip P. Crimmins and Walter S. Tenner 5-57
How Vanadium Affects Steel, by L. A. Erasmus *(d)* 2-185
Making and Selecting Steel for Cold Forging, by Richard Gaydos 4-109
Making Structural Parts by Powder Metallurgy, by Fred L. Siegrist 6-89
Materials for Fabricating High Strength Structures 3-9
Measuring Retained Austenite by X-Ray Techniques, by Ragnar Lindgren 4-102
The New Breed of Stampings, by Frank Covelli 1-91
Notch Brittleness in Steel, by J. F. Knott and A. H. Cottrell *(d)* 6-158
Outlook for Pressure Casting, by Carl R. Weymueller 5-113
Pickling in Hydrochloric Acid . . . A Better Way to Clean Steel, by David E. Poole 3-119
Progress in Control of Surface Finishes *(tn)* 2-7
Selecting the Right Steel for Porcelain Enameling, by Michael C. Kopchak ..3-109
A Tough Weldable Steel With a 140,000 Psi Yield Strength, by Allan M. Rathbone, John H. Gross and Karl E. Dorschu 5-63
Where to Use Terne Coated Steel, by David M. Borcina 5-100

Stress relieving
Stress Relieving Titanium Alloy Weldments in Vacuum, by Herschel R. Green, Jr. 4-72

Stretch forming
Wedge-Action Press Stretch Forms Aluminum Sheet *(tn)* 4-7

Structural steels
Technology Forecast '65 1-67

Sulfides
Properties of Solids That Melt Above 4000 F, by Samuel Sklarew and Melvin J. Albom *(ds)* 2-106

Surface finish
Surface Finish and Mechanical Properties, by R. Courtel *(d)* 4-170

Tantalum
Fatigue in Tantalum, by D. Y. Wang and S. M. Marco *(d)* 5-164
Flash Welding Proved Feasible for Columbium and Tantalum *(tn)* 5-9

Technology Forecast
Technology Forecast '65 1-67

Tensile tests
Determining Forging Ranges by Hot Tensile Impact Testing, by Christian D. Harnish, Lewis P. Myers and Samuel E. Tyson 5-86
Predicting Metalworking Properties From Tensile Test Data, by Tatsuo T. Kumasaka and John W. Barnet 3-84
Testing Metal Foil *(sr)* 4-105

Thermocouples
How Stable Are Thermocouple Alloys, by P. C. Hughes and N. A. Burley *(d)* 3-177

Titanium
Cold Extruding Titanium, by R. J. Fiorentino, A. M. Sabroff and P. D. Frost *(d)* 1-147
Materials for Fabricating High Strength Structures 3-9
Protecting Titanium at High Temperatures, by Raymond L. Farrow and Milton Levy *(d)* 1-182
Technology Forecast '65 1-71
Welding Techniques and Performance Tests, by Robert C. Bertossa *(d)* 2-176

Titanium alloys
How Boeing Machines Titanium Aircraft Parts, by Earl Hill and William J. Maxson 2-90
How We Will Build the SST, by Ralph G. Dermott 2-74
Machining Acrospace Alloys, by P. R. Arzt and I. J. Stewart *(d)* 5-140
Machining Difficult Materials . . . Titanium Alloys, by Michael Field, Norman Zlatin and Robert T. Jameson 2-84
Materials for Gas Turbine Engines, by Howard C. Cross 3-67
Materials for Hydrofoils, by A. E. Hohman and W. L. Kennedy *(d)* 4-158
Materials for Large Power Turbines, by Howard C. Cross 4-91
Stress Relieving Titanium Alloy Weldments in Vacuum, by Herschel R. Green, Jr. 4-72

Transformations
How Austenitizing Temperatures Affect Transformations, by E. P. Klier and Jane Jellison *(d)* 4-178

Transition temperature
How Plate Thickness Affects Transition Temperature, by R. D. Stout, C. R. Roper and D. A. Magee *(d)* 3-169

Tubing
Three-Step Process Builds Low Cost Duplex Tube *(sr)* 2-123

Tungsten
Cutting and Forming of Tungsten Sheet, by Henry W. Babel and Robert M. Bonesteel 4-66
Improving the Ductility of Tungsten, by J. L. Ratliff, D. J. Maykuth, H. R. Ogden and R. I. Jaffee *(d)* 6-169

Tungsten carbide
Engineering Applications for Flame Plating, by Thomas C. McGeary and John M. Koffskey 1-80
Pyrolytically Derived Refractory Materials, by Samuel Sklarew and Melvin J. Albom 2-102

Turbine buckets
Nickel Base Alloys for Turbine Buckets, by James R. Johnston, Charles A. Gyorgak and John H. Sinclair *(d)* 5-158

Turbogenerators
A New Stainless Steel for Turbine Rotors, by Clarence J. Boyle and David L. Newhouse 3-61

Ultrasonic testing
Ultrosonic Test Reveals Quality of Spot Welds *(tn)* 5-7

Uranium
Uses for Depleted Uranium, by M. S. Farkas *(d)* 5-171

Wear
How Ceramic Tools Wear, by A. G. King *(d)* 1-146
Wear and Friction of Solid Surfaces, by William A. Glaeser *(d)* 4-146

Welding
How to Weld Thick Plates of 18% Ni Maraging Steel, by Philip P. Crimmins and Walter S. Tenner 5-57
Inertia Welding . . . An Efficient Joining Technique, by T. L. Oberle, C. D. Loyd and M. R. Calton 6-104
Technology Forecast '65 1-74
A Tough Weldable Steel With a 140,000 Psi Yield Strength, by Allan M. Rathbone, John H. Gross and Karl E. Dorschu 5-63
Ultrasonic Test Reveals Quality of Spot Welds *(tn)* 5-7
Welding Techniques and Performance Tests, by Robert C. Bertossa *(d)* 2-176

Western Metal and Tool Conference
Materials for Fabricating High Strength Structures 3-9

Zinc
Technology Forecast '65 1-73
How to Prepare Hydrided Zircaloy-2 for Microscopic Examination, by McIntyre R. Louthan, Jr. and Charles E. Padgett 5-133

Zirconium alloys
Fabricating Under an Inert Atmosphere, by Leonard M. Bianchi 3-127

Art Director

Metal Progress Is Owned and Published by

THE AMERICAN SOCIETY FOR METALS

Metals Park, Ohio

Subject Index

Adhesive joining
Fabricating Cabinets by Adhesive Joining *(sr)* 3-105

Adhesives
Materials for Advanced Technologies . . . Structural Plastics and Adhesives, by Carl R. Weymueller 3-68

Agricultural equipment
Trends in Applications for High-Strength Steels . . . Agricultural Equipment 2-74

Alloy steels
Cooling Transformation Diagram for AISI 4815 ..... 3-86; *(ds)* 3-88
Cooling Transformation Diagram for AISI 5140 ..... 6-82; *(ds)* 6-84
High-Strength Low-Alloy Steels Hold Paint Longer 2-141
A New Alloy Steel for Wear-Resisting Applications, by Damian V. Gullotti, John L. Hurley and Charles H. Shelton 5-91
SAE Standard Alloy Steel Compositions *(ds)* 4-136
Selecting Steels for High-Strength Fasteners, by Frank L. Gill 6-58
Steels in the Auto Industry, by Carl R. Weymueller 4-128

Aluminum
Aluminum Brazing Process Eliminates Flux and Salt Bath *(tn)* 6-9
Color Finishing of Aluminum, by Erik F. Barkman and Hugh C. Barnes, Jr. 1-54
Materials for Advanced Technologies . . . Titanium and Aluminum, by Carl R. Weymueller 3.60
Mechanical, Chemical and Anodic Coatings for Aluminum *(ds)* 1-86
Plating Process for Aluminum Parts Finds Commercial Applications *(tn)* .. 6-7
Railroad Tests Prototype Aluminum Hopper Car *(tn)* 3-8
Recovery of Aluminum From Casting Operations, by A. E. Hyde *(sr)* 5-119
Silver in Aluminum Alloys, by J. T. Vietz, K. R. Sargant and I. J. Polmear *(d)* 3-138
Trends in the Selection of Light Metals for Auto Parts, by Fred L. Siegrist ..4-160
What to Look for When Welding 2014 Aluminum, by Milton H. Bankard and Irving Pincus 6-74

Aluminum, anodized
Accelerated Corrosion Tests . . . Are They Reliable?, by G. Fred Bush 4-152
Color Finishing of Aluminum, by Erik F. Barkman and Hugh C. Barnes, Jr. 1-54
Hard Anodizing of Aluminum Components, by Colonel R. Kliemann 1-63

Analysis of variance
Statistics Help Solve Problems in Heat Treating and Forming, by C. Kenneth Divers 6-61

Annealing
Annealing and Carburizing Close-Tolerance Driving Gears, by Whitney Snyder 4-121

Anodizing
Color Finishing of Aluminum, by Erik F. Barkman and Hugh C. Barnes, Jr. 1-54
Hard Anodizing of Aluminum Components, by Colonel R. Kliemann 1-63

Appliances
Trends in Applications for High-Strength Steels . . . Appliances and Yard Equipment 2-75

Architecture
Trends in Applications for High-Strength Steels . . . Construction and Architecture 2-66

Austenite, retained
Retained Austenite and Dimensional Stability, by John Y. Riedel 3-78

Automobiles
Annealing and Carburizing Close-Tolerance Driving Gears, by Whitney Snyder 4-121
Assembly of Reinforced-Plastic Automobile Bodies, by Fred L. Siegrist 4-239
Chrysler Builds Its Biggest Stamping Plant, by J. D. Quinn 4-142
Cold Extrusion Puts the Squeeze on Cost of Auto Parts, by Alfred Braun 4-139
Determining Wall Thickness in Cast Iron Engine Blocks, by Alvin E. Rumley ..4-234
Focus on Materials for Automotive Progress, by Allen G. Gray 4-104
How Chrysler Uses Gas Metal-Arc Welding, by Thomas M. Hudson (Interview Report) 4-125
New Casting Technology From Metallurgical Research, by James C. Holzwarth 4-111
New Copper Alloy for Hydraulic Brake Lines, by R. J. Sirois 5-64
Pontiac's High-Speed Plating Machine, by Ralph M. Williams 5-73
Powder Metal Usage at Ford, by John Cenko 4-258
Specifications for Electroplated Parts, by Donald M. Bigge (Interview Report) 4-148
Steels in the Auto Industry, by Carl R. Weymueller 4-128
Trends in Applications for High-Strength Steels . . . Autos and Trucks 2-58
Trends in Castings for Automotive Applications, by William B. Larson 6-52
Trends in the Selection of Light Metals for Auto Parts, by Fred L. Siegrist 4-160

Bearings
Focus on Materials for Automotive Progress, by Allen G. Gray 4-104
Infrared Control Aids Heat Treatment of Bearings, by Gary L. Greenberg and Roy C. Usack 5-87
Marstressing . . . A Heat Treating Process to Improve the Life of Ball Bearings, by Donald P. Koistinen and A. J. Gentile 4-106
What Engineers Should Know About Self-Lubricating Plastics, by G. Ronald Bower *(sr)* 3-106

Beryllium
Materials for Advanced Technologies . . . Beryllium, by Carl R. Weymueller 3-62

Beryllium copper
Beryllium Copper Aids Miniaturization in IBM Computer Design *(tn)* 6-9
When Should You Specify Beryllium Copper Springs, by Fernald S. Stickney 3-115

Blanking
Straight-Edge Blanking, by Heinrich Schmid 6-71

Brass
Delayed Failure in Alpha Brass, by C. C. Koch and A. R. Troiano *(d)* 5-176

Brazing
Low-Temperature Brazing Alloy Joins Aluminum Components *(tn)* 1-7

***(cp)* Critical Point; *(d)* Digest; *(ds)* Data Sheet; *(sr)* Short Runs; *(tn)* Technical News**

Bridges
Trends in Applications for High-Strength Steels . . . Bridges and Highways 2-68

Broaching
Broaching Precision Gears, by Carl R. Weymueller 4-195

Carbonitriding
Getting the Most From Carbonitrided Surfaces, by Nicholas P. Milano 1-79

Carbon steels
Rupture Strength of Carbon Steel, by J. Glen *(d)* 1-143
Steels in the Auto Industry, by Carl R. Weymueller 4-128

Caburizing
Annealing and Carburizing Close-Tolerance Driving Gears, by Whitney Snyder 4-121

Cast iron
Determined Wall Thickness in Cast Iron Engine Blocks, by Alvin E. Rumley 4-235
How Tin Affects Cast Iron, by Colin J. Thwaites 3-100

Casting
Focus on Materials for Automotive Progress, by Allen G. Gray 4-104
New Casting Technology From Metallurgical Research, by James C. Holzwarth 4-111
Recovery of Aluminum From Casting Operations, by A. E. Hyde *(sr)* 5-119
Trends in Castings for Automotive Applications, by William B. Larson 6-52

Ceramics
Materials for Advanced Technologies . . . Oxidation-Resistant Ceremics, by Carl R. Weymueller 3-66

Chromium
A Fast Electrolytic Corrosion Test for Nickel-Chromium Plated Bright Work, by Seward E. Beacom 4-117
Pontiac's High-Speed Plating Machine, by Ralph M. Williams 5-73

Coatings
Cathodic Action Test . . . Evaluating Resistance of Organic Coatings to Sea Water, by Robert W. Turnbull 6-102
Color-Controlled Copper Alloys for Decorative Use, Staff Report 5-55
Mechanical, Chemical and Anodic Coatings for Aluminum *(ds)* 1-86

Cold extrusion
Cold Extrusion Puts the Squeeze on Cost of Auto Parts, by Alfred Braun 4-139
Processing Steel Slugs for Cold Extrusions, by George Ferber 1-89

Columbium
Flash Welding Columbium and Tantalum, by Gordon W. Reeder and Ross Lodwick 1-115

Communication
Trends in Applications for High-Strength Steels . . . Communications and Power Distribution 2-68

Composites
Materials for Advanced Technologies . . . Composites, by Carl R. Weymueller 3-68

Construction
Trends in Applications for High-Strength Steels . . . Construction and Architecture 2-66

Containers
Trends in Applications for High-Strength Steels . . . Containerization 2-64

Continuous casting
Continuous Casting in Canada . . . Curved Mold Unit Goes to Work by Carl R. Weymueller 1-109
Continuous Casting Machine Will Produce Beam Blanks *(tn)* 3-8
Surface Quality of Continuously Cast Steel, by William J. B. Lake 3-125

Controlled atmospheres
Nitrogen-Base Atmospheres, by Leon Chrzan *(d)* 1-136

Cooling curves
Cooling Transformation Diagram for AISI 4815 ..... 3-86; *(ds)* 3-88
Cooling Transformation Diagram for AISI 5140 ..... 6-82; *(ds)* 6-84

Copper
Copper in Ductile Iron Raises Strength and Ductility, by Arthur J. Stone, Thomas R. Baruch and Harold W. Lownie, Jr. 5-71

Copper alloys
Color-Controlled Copper Alloys for Decorative Use, Staff Report 5-55
Copper Alloys for Automotive Applications, by Donaid K. Miner 4-197
New Copper Alloy for Hydraulic Brake Lines, by B. J. Sirois 5-64
Trends in the Application of Copper Alloys, by W. Stuart Lyman 5-59

Corrosion resistance
New Corrosion Detection Technique 6-98
Rust Can Be Beautiful, by Seymour K. Coburn 2-135

Corrosion tests
Accelerated Corrosion Tests . . . Are They Reliable? by G. Fred Bush 4-152
Cathodic Action Test . . . Evaluating Resistance of Organic Coatings to Sea Water, by Robert W. Turnbull 6-102
A Fast Electrolytic Corrosion Test for Nickel-Chromium Plated Bright Work, by Seward E. Beacom 4-117

Cracks
Growth of Fatigue Cracks, by E. P. Dahlberg *(d)* 5-152

Descaling
Descaling Titanium in Salt, by Donald R. Zaremski 6-117

Dielectrics
Materials for Advanced Technologies . . . Electronic Materials, by Carl R. Weymueller 3-67

Die quenching
Die Quenching of High-Strength Steel Truck Frames, by Leonard J. Kube 2-78

Drawing
Transfer Presses Recommended for High-Production Drawing *(tn)* 2-7

Editorial
Accent on Higher Strength, by Allen G. Gray *(cp)* 2-53
All Engineers Are Interested in Failures, by Allen G. Gray *(cp)* 3-53
The Case for Individual Research, by W. J. Kroll *(cp)* 1-53
The Changing Role of the Engineer, by Allen G. Gray 6-51
Detroit Seeks Technological Innovation, by Allen G. Gray *(cp)* 4-103
Keep an Eye on Composites, by Allen G. Gray *(cp)* 5-53

Electric contacts
How to Select Electrical Contacts, by George A. Meyer 1-92

Electrochemical machining
Machining Electrochemically *(d)* 3-168

Electroplating
Accelerated Corrosion Tests . . . Are They Reliable?, by G. Fred Bush 4-152
Fast Corrosion Test Checks Electroplate on Steel and Zinc *(tn)* 2-7
A Fast Electrolytic Corrosion Test for Nickel-Chromium Plated Bright Work, by Seward E. Beacom 4-117
Heating Corrosive Liquids With Natural Gas *(sr)* 5-120
Plating Process for Aluminum Parts Finds Commercial Applications *(tn)* 6-7
Pontiac's High-Speed Plating Machine, by Ralph M. Williams 5-73
On-Site Plating Process Applied Gold to Church Domes *(tn)* 3-7

Embrittlement, in hydrogen
Test Methods Focus on Production Problems, by George H. Robinson 4-113

Engineering
The Engineer's New Role in the Automotive Industry, by Donald N. Frey 4-7

Fasteners
Selecting Steels for High-Strength Fasteners, by Frank L. Gill 6-58
Trends in Applications for High-Strength Steels . . . Fasteners 2-76

Fatigue
Fatigue Failure in Contact Loading, by J. C. Tyler, R. A. Burton and P. M. Ku. *(d)* 3-166

Ferrite
Strengthen Cast Stainlesses by Controling Ferrite 3-141

Fiber metallurgy
Materials for Advanced Technologies . . . Fibers, by Carl R. Weymueller 3-70

Finishing
Color Finishing of Aluminum, by Erik F. Barkman and Hugh C. Barnes, Jr. 1-54

Forming
Chrysler Builds Its Biggest Stamping Plant, by J. D. Quinn 4-142
Electrohydraulic Forming, by R. J. Schwinghamer *(d)* 6-146
How to Form High-Strength Steels Economically 2-103
Statistics Help Solve Problems in Heat Treating and Forming, by C. Kenneth Divers 6-61
Straight-Edge Blanking, by Heinrich Schmid 6-71

Fracture
How Components Fail—I . . . Modes of Fracture, by Donald J. Wulpi 3-72
How Components Fail—II . . . Types of Loading, by Donald J. Wulpi 5-83
How Components Fail—III . . . Effects of Variables, by Donald J. Wulpi 6-65

Free-machining steels
Free-Machining Steel Reduces Costs by 50% *(tn)* 1-9

Gears
Annealing and Carburizing Close Tolerance Driving Gears, by Whitney Snyder 4-121
Broaching Precision Gears, by Carl R. Weymueller 4-195

Germanium
Materials for Advanced Technologies . . . Electronic Materials, by Carl R. Weymueller 3-67

Glass fibers
Materials for Advanced Technologies . . . Fibers, by Carl R. Weymueller 3-70

Graphite
Materials for Advanced Technologies . . . Graphite and Their Coatings, by Carl R. Weymueller 3-66
Progress in Solid Lubricants, by Harold E. Sliney and Bernard C. Stupp *(d)* 3-159

***(cp)* Critical Point; *(d)* Digest; *(ds)* Data Sheet; *(sr)* Short Runs; *(tn)* Technical News**

Hard surfacing
Hard Facing Upgrades Turbine Engine Components, by Elihu F. Bradley 5-79

Hardenability tests
A Hardenability Test for Deep-Hardening Steels, by Cornelis F. Etienne and Cornelis P. Scheepens 6-77

Heat treatment
Annealing and Carburizing Close-Tolerance Driving Gears, by Whitney Snyder 4-121
Focus on Materials for Automotive Progress, by Allen G. Gray 4-104
Heat Treating Jet Components in Salt Baths *(sr)* 5-119
Infrared Control Aids Heat Treatment of Bearings, by Gary L. Greenberg and Roy C. Usack 5-87
Low-Temperature Salt Bath Removes Tenacious Oxides From Titanium, *(tn)* 5-8
Marstressing . . . A Heat Treating Process to Improve the Life of Ball Bearings, by Donald P. Koistinen and A. J. Gentile 4-106
Nitrogen-Base Atmospheres, by Leon Chrzan *(d)* 1-136
Quenching . . . Key to Better Heat Treating, by Warren F. Rushman 4-118
Statistics Help Solve Problems in Heat Treating and Forming, by C. Kenneth Divers 6-61

High-strength steels
Better High-Strength Steels Through Controlled Cooling *(tn)* 1-7
Composition, Properties and Producers of High-Strength Steels *(ds)* 2-87
Die Quenching of High-Strength Steel Truck Frames 2-78
Fabricating the Ultrahigh Strength Steels, by A. M. Hall 3-91
Fabricating Thick Wall Components From Medium and High-Strength Steels, by Perry C. Arnold 2-82
High-Strength Low-Alloy Steels Hold Paint Longer 2-141
How to Form High-Strength Steels Economically 2-103
How to Insure Weld Integrity of High-Strength Steel Structures, by Richard P. Turner 6-121
Galvanized High-Strength, Low Alloy Steels, by George F. Melloy 2-123
Materials for Advanced Technologies . . . High-Strength Steels, by Carl R. Weymuller 3-58
Rust Can Be Beautiful, by Seymour K. Coburn 2-135
Selecting Higher-Strength Steels for Pressure Vessels, by Robert D. Stout and Alan W. Pense 2-147
The Status of Ultrahigh Strength Steels Today, by A. M. Hall 2-178
Trends in Applications for High-Strength Steels 2-58
Welding High-Strength Quenched and Tempered Alloy Steels, by George E. Linnert 2-95
Welding Procedures Developed for High-Strength Steel *(tn)* 5-9
What Users Think of High-Strength Steels, by Fred L. Siegrist 2-55

Highways
Trends in Applications for High-Strength Steels . . . Bridges and Highways 2-68

Hydraulic brakes
New Copper Alloy for Hydraulic Brake Lines, by B. J. Sirois 5-64

Hydraulic fluids
Materials for Advanced Technologies . . . Fluids and Lubricants, by Carl R. Weymueller 3-71

Inclusions
Inclusions and Steel Toughness, by A. J. Birkle, D. S. Dabkowski, J. P. Paulina and L. F. Porter *(d)* 5-146

Information Retrieval
Information retrieval in Aerospace Technology, by Bruce W. Pinc *(d)* 5-150

Inspection
Better Springs Through Wire Inspection, by H. Perry Smith 1-96
Inspecting Metals by Ultrasonic Visualization, by Louis G. Klinker, John E. Jacobs, and Otto Gericke 1-82
Rating Steel Cleanliness Ultrasonically 1-109

Iron powder
Iron Powder Compacted as Heavy Disk in High-Velocity Forming Machine *(tn)* 1-8

Lubricants
Progress in Solid Lubricants, by Harold E. Sliney and Bernard C. Stupp *(d)* .3-159
Materials for Advanced Technologies . . . Fluids and Lubricants, by Carl R. Weymueller 3-71
Solid Lubricant Extends Tap Life *(sr)* 1-98

Machining
Broaching Precision Gears, by Carl R. Weymueller 4-195
Machining Precision Parts of Heat Treated Type 416 Stainless *(sr)* 3-104
Precision Machine Bores Axle Housings for Tractors *(tn)* 2-8
Solid Lubricant Extends Tap Life *(sr)* 1-98
Trace-Machining Trims Costs of Tensile Bars, by Lincoln S. Magor 5-94

Magnesium
Trends in the Selection of Light Metals for Auto Parts, by Fred L. Siegrist 4-160

Magnetic materials
Materials for Advanced Technologies . . . Electronic Materials, by Carl R. Weymueller 3-67

Maraging steels
Large Maraging Steel Forgings Anchor Saturn I-B Service Tower *(tn)* 3-9
Manganese Replaces Nickel in New Maraging Steel *(tn)* 1-9

Marine equipment
Trends in Applications for High-Strength Steels . . . Ships and Marine 2-62

Marstressing
Focus on Materials for Automotive Progress, by Allen G. Gray 4-104
Marstressing . . . A Heat Treating Process to Improve the Life of Ball Bearings, by Donald P. Koistinen and A. J. Gentile 4-106

Materials Application Competition
Innovations Highlight Fifth Annual Materials Application Competition 6-87

Materials handling
Trends in Applications for High-Strength Steels . . . Materials Handling 2-77

Metallographic exhibit
How Bending and Annealing Affect Al-$CuAl_2$ Eutectic 6-97

Metallography, replica techniques
Plastic Replicas Help Rate Surface Quality, by David Krashes 3-98

Molybdenum sulfide
Progress in Solid Lubricants, by Harold E. Sliney and Bernard C. Stupp *(d)* 3-159

Nickel
A Fast Electrolytic Corrosion Test for Nickel-Chromium Plated Bright Work, by Seward E. Beacom 4-117
Pontiac's High-Speed Plating Machine, by Ralph M. Williams 5-73

Nitrogen
Nitrogen-Base Atmospheres, by Leon Chrzan *(d)* 1-136

Plasma spraying
Plasma Spraying Bonds Refractory Coatings to Steel *(tn)* 3-7

Plastics
Focus on Materials for Automotive Progress, by Allen G. Gray, ...4-104
Materials for Advanced Technologies . . . Structural Plastics and Adhesives, by Carl R. Weymueller 3-69
What Engineers Should Know About Self-Lubricating Plastics, by G. Ronald Bower *(sr)* 3-106

Plastics, polysulfone
Introducing Polysulfone . . . a Strong Heat Resistant Thermoplastic, Staff Report 1-101

Plastics, reinforced
Assembly of Reinforced-Plastic Automobile Bodies, by Fred L. Siegrist 4-239

Platinum metals
Industrial Applications for the Noble Metals, by Gilbert L. Tugwell 1-73

Powder metallurgy
How to Select Electrical Contacts, by George A. Meyer 1-92
A New Stainless Steel From Powder, by Elihu F. Bradley, Robert A. Sprague and Wilson B. Tuffin 3-83
Powder Metal Usage at Ford, by John Cenko 4-258

Precious metals
Industrial Applications for the Noble Metals, by Gilbert L. Tugwell 1-73

Precipitation-hardening steels
Processing PH 15-7 Mo Stainless, by B. R. Banerjee, J. J. Hauser, and J. M. Capenos *(d)* 5-136
Stress Relieving 17-4 PH Stainless Steel by Overaging, by Henry W. W. Garvin 1-69

Pressure vessels
Fabricating Thick-Wall Components From Medium and High-Strength Steels, by Perry C. Arnold 2-82
Pressure Vessel Fabricated of Clad Metal for Nuclear Power Plant *(tn)* 1-9
Selecting Higher-Strength Steels for Pressure Vessels, by Robert D. Stout and Alan W. Pense 2-147
Trends in Application for High-Strength Steels . . . Tanks and Vessels . . . 2-71

Quenching
Quenching . . . Key to Better Heat Treating, by Warren F. Rushman 4-118

Refractory metals
Materials for Advanced Technologies . . . Refractory Metals, by Carl R. Weymueller 3-64

***(cp)* Critical Point; *(d)* Digest; *(ds)* Data Sheet; *(sr)* Short Runs; *(tn)* Technical News**

Railroads
Trends in Applications for High-Strength Steels . . . Railway Equipment 2-61

Railroad cars
Railroad Tests Prototype Aluminum Hopper Car *(tn)* 3-8

Rapid transit
Trends in Applications for High-Strength Steels . . . Subways and Rapid Transits 2-65

Salt baths
Heat Treating Jet Components in Salt Baths *(sr)* 5-119
Low-Temperature Salt Bath Removes Tenacious Oxides From Titanium *(tn)* 5-8

Sheet
Evaluating Surface Textures of Automotive Sheet Steel, by Carl R. Weymueller 4-213

Ships
Trends in Applications for High-Strength Steels . . . Ships and Marine 2-62

Silicon
Materials for Advanced Technologies . . . Electronic Materials, by Carl R. Weymueller 3-67

Specifications
Specifications for Electroplated Parts, by Donald M. Bigge (Interview Report) 4-149

Springs
Better Springs Through Wire Inspection . . . by H. Perry Smith 1-96
When Should You Specify Beryllium Copper Springs, by Fernald S. Stickney 3-115

Stainless steels
Accelerated Corrosion Tests . . . Are They Reliable? by G. Fred Bush 4-152
Machining Precision Parts of Heat-Treated Type 416 Stainless *(sr)* 3-104
A New Stainless Steel From Powder, by Elihu F. Bradley, Robert A. Sprague and Wilson B. Tuffin 3-83
Processing PH 15-7 Mo Stainless, by B. R. Banerjee, J. J. Hauser, and J. M. Capenos *(d)* 5-136
Strengthen Cast Stainlesses by Controlling Ferrite 3-141
Stress Relieving 17-4 PH Stainless Steel by Overaging, by Henry W. Garvin 1-69
Welded Stainless Tubing Solves Heat and Corrosion Problems *(tn)* 3-9

Stamping
Chrysler Builds Its Biggest Stamping Plant, by J. D. Quinn 4-142

Standard steels
SAE Standard Alloy Steel Compositions 4-136

Standards and specifications
Color-Controlled Copper Alloys for Decorative Use, Staff Report 5-55

Statistical analysis
Statistics Help Solve Problems in Heat Treating and Forming, by C. Kenneth Divers 6-61

Steels
Accelerated Corrosion Tests . . . Are They Reliable? by G. Fred Bush 4-152
Broaching Precision Gears, by Carl R. Weymueller 4-195
Chrysler Builds Its Biggest Stamping Plant, by J. D. Quinn 4-142
Continuous Casting in Canada . . . Curved Mold Unit Goes to Work, by Carl R. Weymueller 1-109
Evaluating Surface Textures of Automotive Sheet Steel, by Carl R. Weymueller 4-213
Focus on Materials for Automotive Progress, by Allen G. Gray 4-104
Growth of Fatigue Cracks, by E. P. Dahlberg *(d)* 5-152
A Hardenability Test for Deep-Hardening Steels, by Cornelis F. Etienne and Cornelis P. Scheepens 6-77
Inclusions and Steel Toughness, by A. J. Birkle, D. S. Dabkowski, J. P. Paulina and L. F. Porter *(d)* 5-146
Move Up in Steel 5-127
Processing Steel Slugs for Cold Extrusions, by George Ferber 1-89
Quenching . . . Key to Better Heat Treating, by Warren F. Rushman 4-118
Retained Austenite and Dimensional Stability, by John Y. Riedel 3-78
Selecting Steels for High-Strength Fasteners, by Frank L. Gill 6-58
Steelmaker Proposes New Concepts for Mass-Transit Systems *(tn)* 3-8
Steels in the Auto Industry, by Carl R. Weymueller 4-128
Surface Quality of Continuously Cast Steel, by William J. B. Lake 3-125
Test Methods Focus on Production Problems, by George H. Robinson 4-113

Stress-strain properties
Determining True Stress-Strain Properties, by Roger D. Lloyd, Henry Hahn and George Fischer *(d)* 5-172

Sulfides
Hardnesses of Sulfides, by H. C. Chao, L. H. Van Vleck, F. Oberin and L. Thomassen *(d)* 5-156

Superalloys
Materials for Advanced Technologies . . . Superalloys, by Carl R. Weymueller 3-61
Thermal Fatigue in Superalloys, by A. W. Franklin, J. Heslop and R. A. Smith *(d)* 4-172

Superconductors
Materials for Advanced Technologies Electronic Materials, by Carl R. Weymueller 3-67

Tanks
Fabricating Thick Wall Components From Medium and High Strength Steels, by Perry C. Arnold 2-82
Trends in Applications for High-Strength Steels . . . Tanks and Vessels 2-71

Tantalum
Flash Welding Columbium and Tantalum, by Gordon W. Reeder and Ross Lodwick 1-115

Test specimens
Trace-Machinging Trims Costs of Tensile Bars, by Lincoln S. Magor 5-94

Tin
How Tin Affects Cast Iron, by Colin J. Thwaites 3-100

Titanium
Descaling Titanium in Salt, by Donald R. Zaremski 6-117
Materials for Advanced Technologies . . . Titanium and Aluminum, by Carl R. Weymueller 3-60
Materials for Extreme Environment, by Robert C. Bertossa *(d)* 6-136

Tool materials
Advances in Tool Materials, by M. Eugene Merchant *(d)* 5-136

Tool steels
Secondary Hardening in Tool Steel, by C. R. Simcoe and A. E. Nehrenberg *(d)* 5-154

Transistors
Materials for Advanced Technologies . . . Electronic Materials, by Carl R. Weymueller 3-67

Transit systems
Steelmaker Proposes New Concepts for Mass-Transit Systems *(tn)* 3-8
Trends in Applications for High-Strength Steels . . . Subways and Rapid Transits 2-65

Trucks
Die Quenching of High-Strength Steel Truck Frames, by Leonard J. Kube .. 2-78
Trends in Applications for High-Strength Steels . . . Autos and Trucks 2-58

Tungsten alloys
Properties of Tungsten Alloys Exceed MAB Targets by Wide Margin *(tn)* .. 6-7

Turbines
Hard Facing Upgrades Turbine Engine Components, by Elihu F. Bradley 5-79

Ultrasonic testing
How to Insure Weld Integrity of High-Strength Steel Structures, by Richard P. Turner 6-121

Value engineering
Making Products That Last . . . The Story of the Westinghouse Reliability Program, by Carl R. Weymueller 5-98

Wear, tests
Test Methods Focus on Production Problems, by George H. Robinson 4-113

Welding
Black Plate Being Used in Flux-Cored Welding Wire *(tn)* 6-8
Flash Welding Columbium and Tantalum, by Gordon W. Reeder and Ross Lodwick 1-115
How Chrysler Uses Gas Metal Arc Welding, by Thomas M. Hudson (Interview Report) 4-125
Pressure Vessel Welds Made by Electroslag Process *(tn)* 6-9
Welding High-Strength Quenched and Tempered Alloy Steels, by George E. Linnert 2-95
Welding Procedures Developed for High-Strength Steel *(tn)* 5-9
What to Look for When Welding 2014 Aluminum, by Milton H. Bankard and Irving Pincus 6-74

Welds
Factors That Determine Weld Properties, by J. Garstone and F. A. Johnson *(d)* 1-144

Whiskers
Materials for Advanced Technologies . . . Composites, by Carl R. Weymueller 3-68

Wire
Better Springs Through Wire Inspection, by H. Perry Smith 1-96

Wiredrawing
Wiredrawing in Ultrasonic Tank Reduces Surface Imperfections *(tn)* 5-9

Zinc die castings
Accelerated Corrosion Tests . . . Are They Reliable? by G. Fred Bush 4-152
